Executive Summary

Source URL: https://www.teksystems.com/en/
Analysis Date: 2026-02-25

The TEKsystems homepage is a content-rich marketing page with 9 distinct sections spanning a hero area, featured content slider, services overview, partner logos, success stories, company statistics, insights articles, and a CTA banner.

Key Metrics:

Total Sections:	**9**
Sections Mapped to Blocks:	**7**
Default Content Sections:	**2**
Unique EDS Block Types:	**5**
Section Styles Needed:	**4**

EDS Blocks Used:

Hero — 1 instance
Primary hero with background image/video, H1, description

Carousel — 1 instance
Featured stories slider with image + text cards

Columns — 3 instances
"What We Do" image+text, Success Story + stat, CTA banner

Cards — 2 instances
Partner logos grid, Insights article cards

Embed (Stats) — 1 instance
Company statistics with circular charts (custom)

Section 1: Announcement Bar

Security Alert: Click **here** to learn how to protect yourself from recruitment scams.

EDS Block Type: Default Content

Decision: Default Content

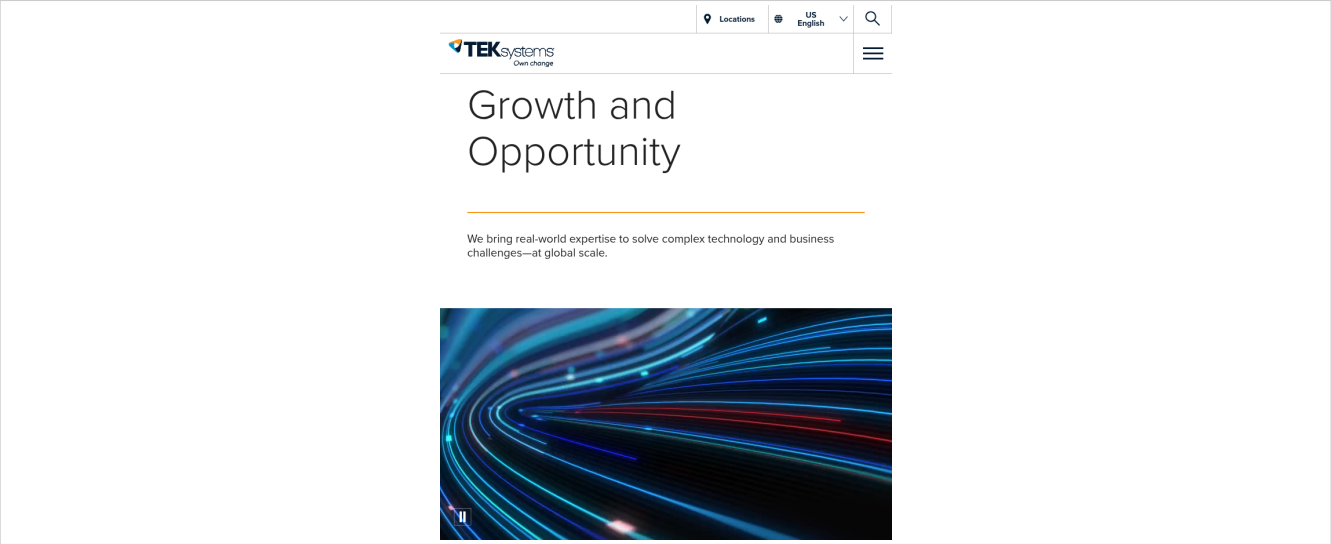
Analysis:

A lightweight alert/announcement bar showing a security scam warning with a link. This is simple text with a link — best authored as default content (paragraph with inline link). Can be placed above the hero in a styled section or handled via a fragment.

Content Model:

Row	Column 1	Column 2
Row 1	Security Alert: Click here to learn...	(link to /en/scam-alert)

Section 2: Primary Hero



EDS Block Type: Hero

Block Variant: hero (with video/animated background)

Decision: Block

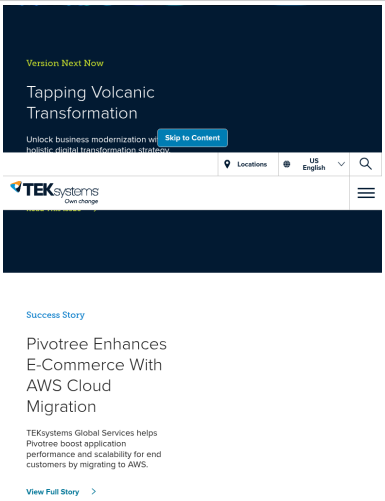
Analysis:

A full-width hero section featuring a large H1 heading ("Accelerate Business Growth and Opportunity"), a supporting paragraph, and a background image/video of abstract light trails. Includes a pause button for the animated background. This maps directly to the EDS Hero block with a background image row and text content row containing heading + description. The animated video background would be a poster image in EDS.

Content Model:

Row	Column 1	Column 2
Row 1	Hero	—
Row 2	Background image (light trails)	—
Row 3	H1: Accelerate Business Growth...	Description paragraph + CTA

Section 3: Featured Stories Slider



EDS Block Type: Carousel

Block Variant: carousel (featured stories)

Decision: Block

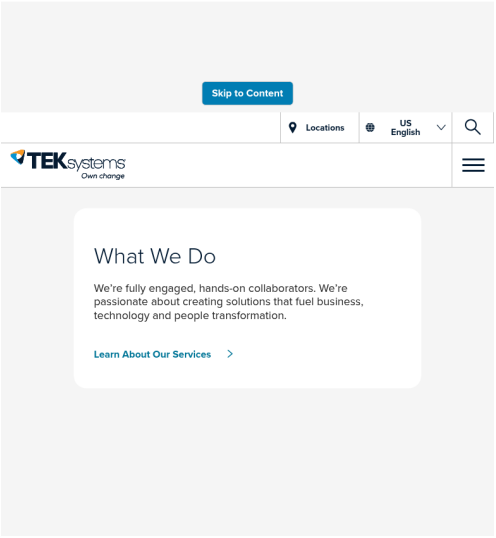
Analysis:

A content slider with 2 featured story cards, each containing a category tag ("Version Next Now", "Success Story"), H2 heading, description paragraph, CTA link, and a side image. This maps to the EDS Carousel block where each slide is a row with an image column and a text content column. The dark overlay on the first slide and light background on the second suggest variant styling.

Content Model:

Row	Column 1	Column 2
Row 1	Carousel	—
Row 2	Image (volcanic transformation)	Tag: Version Next Now | H2 + description + CTA
Row 3	Image (blue light streaks)	Tag: Success Story | H2 + description + CTA

Section 4: What We Do



EDS Block Type: Columns

Block Variant: columns (image-text)

Section Style: light-grey

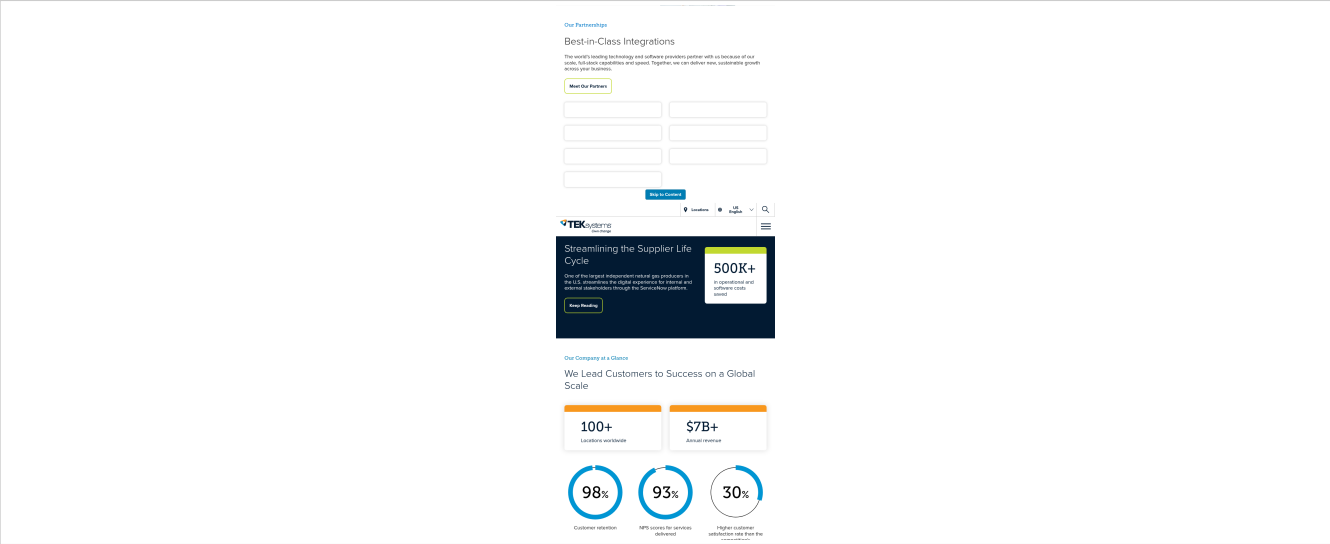
Decision: Block

Analysis:

A two-part layout on a light grey background. Left side shows an overlapping image collage (3 images stacked/offset). Right side contains a content card with H2 heading "What We Do", description paragraph, and a CTA link. This maps to the EDS Columns block with 2 columns: Column 1 = stacked images, Column 2 = heading + text + CTA. The overlapping image effect would require custom CSS for the block variant.

Content Model:

Row	Column 1	Column 2
Row 1	Columns	—
Row 2	Image collage (3 overlapping images)	H2: What We Do | description | CTA link



EDS Block Type: Cards (no images) + Cards

Block Variant: cards-partners (logo grid)

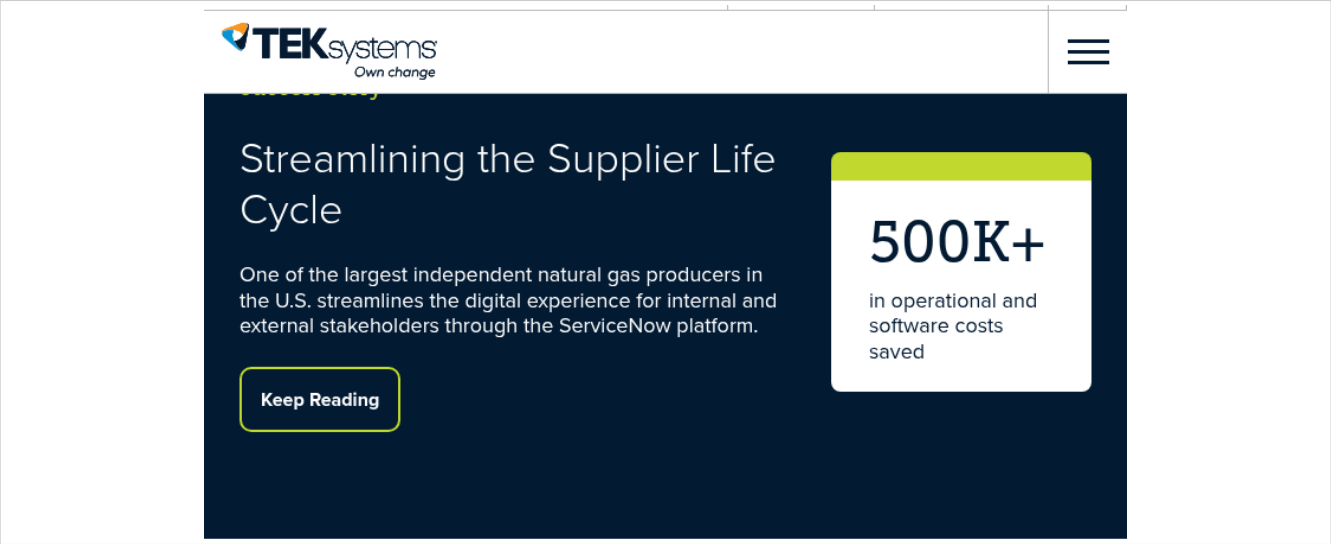
Decision: Block

Analysis:

This section has two sub-components: (1) An introductory text area with category tag "Our Partnerships", H2 heading "Best-in-Class Integrations", description, and CTA button "Meet Our Partners". (2) A grid of 7 partner logos (AWS, Google Cloud, Microsoft, Red Hat, Snowflake, ServiceNow, Salesforce) each linking to a partner page. The intro text is default content. The logo grid maps to EDS Cards block where each card row has a partner logo image and partner name text linking to the partner page.

Content Model:

Row	Column 1	Column 2
Row 1	Cards	—
Row 2	AWS logo + link	—
Row 3	Google Cloud logo + link	—
Row 4	Microsoft logo + link	—
Row 5	Red Hat logo + link	—
Row 6	Snowflake logo + link	—
Row 7	ServiceNow logo + link	—
Row 8	Salesforce logo + link	—



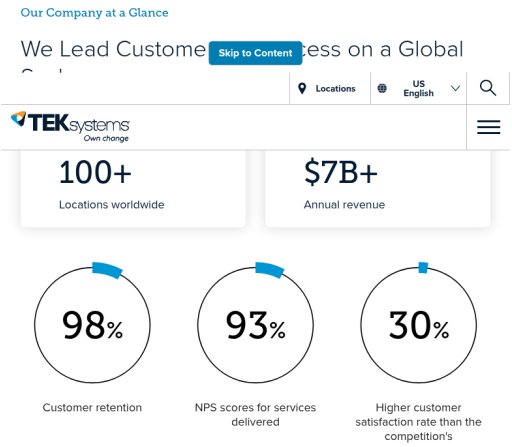
EDS Block Type: Columns
Block Variant: columns (story-stat)
Section Style: dark
Decision: Block

Analysis:
A dark navy background section with two columns. Left column has a category tag "Success Story", H2 heading "Streamlining the Supplier Life Cycle", description paragraph, and CTA button "Keep Reading". Right column features a prominent statistic card showing "500K+" with supporting text "in operational and software costs saved" on a light background with a yellow-green accent bar. Maps to EDS Columns with dark section-metadata style.

Content Model:

Row	Column 1	Column 2
Row 1	Columns	—
Row 2	Tag + H2 + description + CTA button	Stat: 500K+ | in operational and software costs saved

Section 7: Company at a Glance (Stats)



EDS Block Type: Columns (custom)

Block Variant: columns-stats (custom variant)

Decision: Block

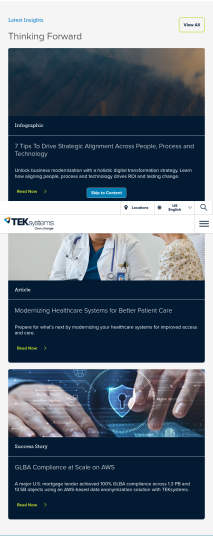
Analysis:

A statistics showcase section with: (1) Header area with eyebrow "Our Company at a Glance" and H3 subheading. (2) Two icon+number stat cards: "100+ Locations worldwide" and "$7B+ Annual revenue" with icons and colored accent bars. (3) Three circular progress charts: "98% Customer retention", "93% NPS scores", "30% Higher satisfaction rate". This requires a custom block variant. The stat cards map to Columns, while the circular charts need custom CSS for the donut-style visualization. Could be split into two blocks or one custom stats block.

Content Model:

Row	Column 1	Column 2
Row 1	Columns	—
Row 2	Icon + 100+ Locations worldwide	Icon + $7B+ Annual revenue
Row 3	98% Customer retention	93% NPS scores | 30% Higher satisfaction

Section 8: Latest Insights



EDS Block Type: Cards

Block Variant: cards (article cards)

Section Style: light-grey

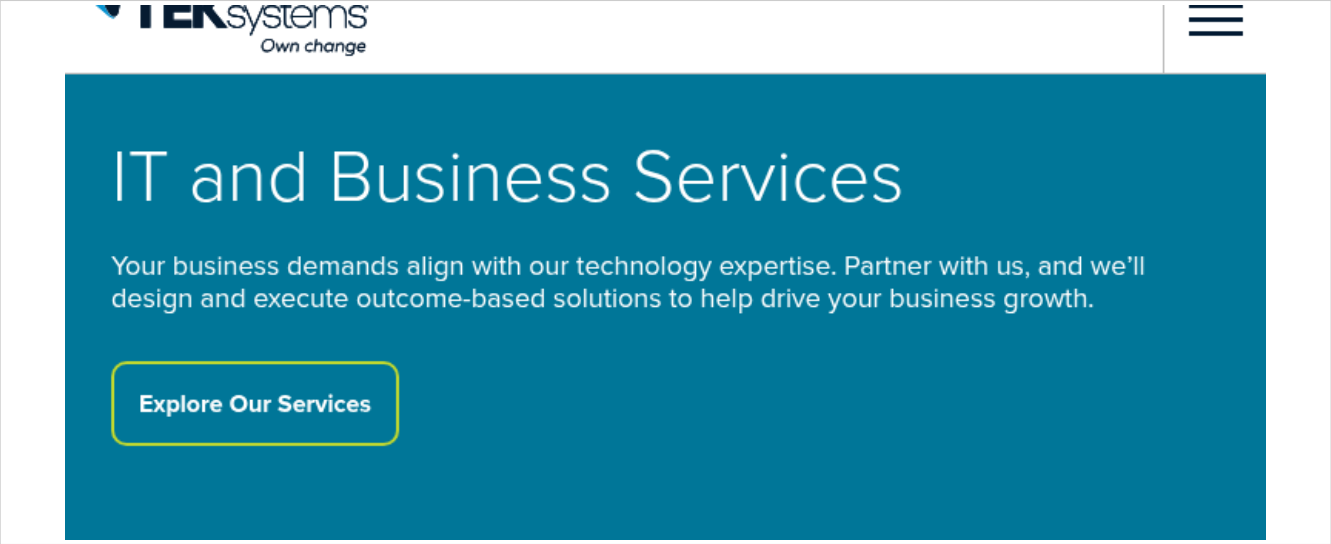
Decision: Block

Analysis:

A content section on light grey background with: (1) Header with eyebrow "Latest Insights", H2 "Thinking Forward", and "View All" link. (2) Three article cards in a row, each with: a featured image, category tag (Infographic/Article/Success Story), H3 heading, description paragraph, and "Read Now" CTA button. This is a classic Cards block pattern. The header text is default content above the Cards block. Each card becomes a row with image + text content.

Content Model:

Row	Column 1	Column 2
Row 1	Cards	—
Row 2	Image (volcanic)	Infographic | H3: 7 Tips... | description | CTA
Row 3	Image (doctor)	Article | H3: Modernizing Healthcare... | description | CTA
Row 4	Image (cybersecurity)	Success Story | H3: GLBA Compliance... | description | CTA



EDS Block Type: Default Content

Section Style: teal

Decision: Default Content

Analysis:

A full-width teal/cyan colored banner with H2 heading "IT and Business Services", a supporting paragraph, and a CTA link "Explore Our Services". This is simple default content (heading + paragraph + button link) within a teal-styled section. No block needed — an author would type the heading, paragraph, and add a link. The teal background is handled by section-metadata with style "teal".

Block Inventory Summary

Recommended EDS Block Variants for TEKsystems Homepage:

Block	Variant	#	Source	Notes
hero	hero (default)	1	Block Collection	Background image + H1 + description. May need custom CSS for video/animated background poster.
carousel	carousel-stories	1	Block Collection + Custom CSS	Featured content slider with image + category tag + heading + description + CTA per slide.
columns	columns-image-text	1	Block Collection + Custom CSS	"What We Do" section with overlapping image collage left and text card right.
cards	cards-partners	1	Block Collection + Custom CSS	Partner logo grid with linked logos. Custom styling for grid layout and hover effects.
columns	columns-story-stat	1	Block Collection + Custom CSS	Dark background columns with story text left and highlighted statistic card right.
columns	columns-stats	1	Custom Block	Company stats with icon cards and circular progress charts. Requires custom JS for chart rendering.
cards	cards-articles	1	Block Collection + Custom CSS	Article cards with image, category tag, heading, description, and CTA.

Section Styles Required:

- **light-grey** — Sections 4 (What We Do), 8 (Latest Insights)
- **dark** — Section 6 (Success Story Highlight)
- **teal** — Section 9 (CTA Banner)
- **(none/default)** — Sections 2, 3, 5, 7

Recommendations:

1. The Hero block can use the standard EDS Hero from the Block Collection. A poster image should replace the animated video background.
2. The Carousel block needs custom CSS for the category tag overlay and dark/light slide styling variations.
3. Partner Logos (Cards) needs a custom grid variant since the standard Cards layout is vertical, but logos are displayed in a compact grid.
4. Company Stats section requires a custom block with JavaScript for the animated circular progress charts.
5. Article Cards can start from the standard Cards block with CSS customization for the category tag badge and dark image overlay.
6. Three sections use default content with section-metadata styling (Announcement Bar, CTA Banner, and section headers).
